

**SOLAR**  
**THAT PAYS FOR**  
**ITSELF**

**SolarPay**<sup>®</sup>

1

**We install a smart solar system and put that new roof of yours to work**

2

**You can access cheaper power from the solar system instead of buying it from the grid**

3

**Every day the sun shines, you're a day closer to owning it outright**

4

**It's yours to keep in just 60 months (or sooner if you like)**

## 6.6kW Smart Solar System

## Free Electric Vehicle Charger

## Smart Energy App

### YOUR SMART SOLAR PACKAGE INCLUDES:

- 6.6kW Solar System with Tier 1 Jinko Panels and a 5kW SolaX Inverter
- Solar inverter integrated into your wall during construction for a nice clean look
- Free Electric Vehicle Charger installed in your new garage
- Smart Energy App to track your usage and solar on your phone

**It's not finance, so  
there's no repayments,  
interest or fees. Ever.**

**- Mick Beasley**

National Construction Manager, Stoddart Group

## Why pay for a new solar system, when it could just pay for itself?

Right across Australia, SolarPay® is enabling thousands of new home owners to harness the power of the sun, cutting the cost of their household energy bills at the same time as paying off a state-of-the-art solar system. You can choose to own the system outright the day you move, a year or two later, or just forget it's up there and its yours to keep in 60 months.

**Every SolarPay customer saves at least \$1000 per year**  
(plus bill savings from using the solar system)

## MATCH YOUR SYSTEM TO YOUR LIFESTYLE:

If you choose to upgrade, you'll have access to more discounted power during the SolarPay term, and then once you own the system outright, it'll be just right.

### Add more panels

If you have a larger family or run hungry appliances then you can easily upgrade to an 8.2kW or 10.2kW system.

### Add a battery

Upgrade to a 'battery ready' inverter, or, add a battery for cheaper night time power as well.

### Upgrade your EV charger

For homes with three phase connections, upgrade the included EV charger to a higher output unit.

## There's a reason why Australia's best builders trust Stoddart Group

Our products underpin the construction of tens of thousands of new homes each year. That's because builders right around our great country trust us to deliver quality products time and time again. As our climate continues to change, we're doing our bit to help every Australian household prepare for the renewable energy future.

### Disclaimer

Minimum savings of \$1000 per annum is based on the annual reduction in the buy outright price in the SolarPay agreement. 6.6kW Smart Solar Package is available when you enter into a contract to allow the supplier to install the solar system on your roof. The supplier will own the solar output for the first 60 months and you will have the option to buy the solar electricity produced at a discounted rate during this period. After 60 months you will own the solar system outright and have access to all the benefits of solar energy for your own use and to sell back to the grid. You have the option to purchase the system outright at any time and the price reduces by \$1000 each year. To access the discounted solar electricity, you must have your home electricity account with Powershop, who will offer a discount off its standard rates for all solar used for the first 60 months. Customer is free to change electricity suppliers at any time.
